FINAL WEEKLY COVID REPORT

MIDDLETON HEALTH DEPARTMENT – The Middleton Health Department (MHD) will conclude this week with their weekly COVID19 Reports. The MHD has provided weekly COVID19 reports for over one year (approximately 60 weekly reports) to the community of Middleton and beyond. The MHD will continue to provide COVID19 data on the Town of Middleton website found at www.middletonma.gov and through social media venues such as the MHD Facebook page: <https://www.facebook.com/midpubhealth>.

The MHD will continue to provide updated information or awareness when warranted and continue to work with schools, business sectors, and the community related to COVID information, data, and pressing news.

COVID19 is still present in society and personal protection is still promoted and recommended. As things open up, the MHD health department have their hands full with additional responsibilities associated with programs, activities, business, residents and more. Our time is still focused on COVID19 prevention and response at the same time as all the spring and summer things coming our way such as, but not limited to, recreational camps, semi-public and public pools, mosquito control (EEE/WNV), restaurant inspections, septic systems and wells, bathing beach sampling, and more. On behalf of the MHD, we thank you for reading our weekly reports and utilizing the information to make our community more safe and aware!
